Job description

What is iTunes Video?

iTunes is the home of digital films. From Indian and Hollywood blockbusters to classics and indie favourites, if it's worth watching, it's on iTunes. Our titles are available at just one click away for purchase or rent and by asking Siri on the tv remote. They are delivered at the highest quality and are available through iTunes in the Cloud. We are passionate about film and we want likeminded people to join our team.

At the heart of iTunes is human curation. Our editors browse through the new and the undiscovered, and present it in the most engaging way. Our goal is to share the best content with the world.

We are passionate about great acting, surprising storytelling and astonishing visuals, across every genre. Our editors are always after the next great film that makes us feel something. When we find titles with these qualities, we can't wait to introduce them to our customers.
