Document Management System Wikipedia

A document management system (DMS) is a system (based on computer programs in the case of the management of digital documents) used to track, manage and store documents and reduce paper. Most are capable of keeping a record of the various versions created and modified by different users (history tracking). The term has some overlap with the concepts of content management systems.

New Job Electronic Application Management System US

The U.S. Mission to Cameroon is pleased to introduce a new electronic application management system which will be used to hire new employees of the Mission. Effective November 14, 2018, the Mission will no longer accept paper or email applications. The entire application process will be done online, using the Electronic Recruitment Application (ERA) powered ...

Human Resource Management System Wikipedia

A human resources management system (HRMS) or human resources information system (HRIS) is a form of human resources (HR) software that combines a number of systems and processes to ensure the easy management of human resources, business processes and data. Human resources software is used by businesses to combine a number of necessary HR functions, such as storing employee data, â€|
