1)  $\text{HCO}_3^-$  ion act as the principle buffer in human blood.

- When acid enters the blood, the extra  $\text{H}_3\text{O}^+$  ions are removed by  $\text{HCO}_3^-$  ions which act as a base:

- When base enters the blood, extra  $\text{OH}^-$  ion are removed by carbonic acid.

### **Bufferbloat Wikipedia**

Bufferbloat is a cause of high latency in packet-switched networks caused by excess buffering of packets. Bufferbloat can also cause packet delay variation (also known as jitter), as well as reduce the overall network throughput. When a router or switch is configured to use excessively large buffers, even very high-speed networks can become practically unusable for many interactive applications ...
